DETAILED ACTION

1. This Office Action is in response to the patent application number 09/902,986 filed July 11, 2001.
2. The present patent application claims priority from domestic US Application 60/217,628 filed 11 July 2000.
3. The submitted Information Disclosure Statements with references are considered and entered in the file application.
4. The pending claim 1 is examined as follow:

Drawings

5. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the text labels for the boxes shown in Figs. 13A, 13B, 16, and 21 as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Istvan et al (US Publication No. 2002/0060750).

With regard to claim 1:

Istvan discloses a method of displaying multimedia contents on a display area of a broadband internet-enabled television system. The method of Istvan discloses what is claimed in the present application. As claimed in the present application, Istvan discloses a method for accessing information on the Internet. The method includes a browser, a computer system (Internet appliance), wherein the computer system includes a display. Istvan also includes a remote control (having reduced-keyset) (fig. 11), wherein the remote controller includes a plurality of keys including directional keys, numeric keys, and a number of function keys. The method further includes displaying a user interface screen on the display device, wherein the screen is divided into a plurality of screen layout areas, that is, primary display screen area (e.g. fig. 3, #301), and at least a primary controls on the left side (first control area) (e.g. fig. 3, #302) and a context-sensitive area on the top (second control area) (e.g. fig. 3, #304). As in the present invention the primary screen area is used to display content information of a web page or any access able information source (e.g. figs. 4, and 10, 13-17). The first control area containing one or more mode icons for selecting a mode of the browser application, and the second control area containing one or more command icons depending/associating with the selected mode (fig. 8-9). Similar to a navigating mode, Istvan further describes displaying a plurality of selectable interface elements including selectable (via remote control) web pages (e.g. figs. 8, and 9). Also, similar to a browser mode, Istvan further describes displaying content of the selected displayed element, such as content of a web page, content of a selected TV channel, advertisement content,

and other content information (e.g. figs. 4, 10, and 13-17). Furthermore, in either mode associated command icons are available for selection (via remote controller) (e.g. figs. 4, 8-10, and 13-17, also refer to description of the figs.).

Conclusion

7. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R § 1.111(c) to consider the reference fully when responding to this action. The documents cited therein Gottfurcht et al US Pat. No. 6,600497 teaches a method of providing easy navigation/browsing a document by using a single or fewer keys. The teaching is similar to the present claimed invention.

8. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Tadesse Hailu, whose telephone number is (703) 306-2799. The Examiner can normally be reached on M-F from 10:00 - 6:30 ET.
